

Performance Text Project

Download the attached Word document.
Use the text provided to create a single web page.

Use html code to format the text to the most readable. You may use your notes and handouts or any other resources.

You may not ask for assistance from your instructor or another student.

You must use at two one custom fonts - one linked and one downloaded. Remember that custom fonts must be in a folder labeled "fonts".

- You **must** use colors (other than black and white) for your background and text colors.
- You may incorporate an image if desired, but not required.

HTML file, fonts, css (if external) and images (if used) must be in a folder entitled "Text Performance"

Submission: Zip compressed folder to this assignment on Blackboard.
